EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Raymond E. Vache on 4/29/2004.

The application has been amended as follows:

In the specification:

Page 3 line 6, "4a" has been changed to --4--.

Page 6, the abstract has been deleted and inserted on a separate sheet of paper as

--ABSTRACT

A bracket assembly used for raising and supporting the foundation or slab of a building. The assembly includes a cylindrical sleeve, lifting beam, spacer and two removable flanges to which a hydraulic or screw lifting system is attached. The assembly is used where the lifting bracket is installed under a foundation and a piling inserted through the sleeve and force into the ground by the lifting system attached to the top of the piling. Cost saving is realized since the flanges are removed after the building has been leveled and reused at subsequent jobs.--

In the claims:

Claim 1 lines 18-20, "said through ... described items," has been deleted.

Claim 1 line 30, "spacer holes" has been changed to --through hole--.

Claim 1 line 32, after "inserted" --through the flange holes and through hole--has been inserted.

Claim 1 line 32, after "attached" -- thereto--has been inserted.
